Outdoor Hockey Goal

The outdoor hockey goal post is made from extra sturdy aluminium profiles. The goal measures a width of 3.66 m and a height of 2.14 m. The top projection measures 0.9 m, whereas the bottom one is 1.2 m. The goal frame is manufactured from an extra sturdy rectangular profile with a cross section of 75x50x6 mm. The profile is specially designed to reduce dents from the ball impact. The front frame is white coated and equipped with our 'INTERLOCK' net hook system. The lower section of the goal post is made from extra strong aluminium boards, which are covered with EPDM. The boards are 46 cm high. The net is fixed free hanging. Therefore the ball cannot hit the support structure of the net, which prevents the ball from bouncing out of the goal. The goal post is further equipped with transport wheels. The total of 4 wheels ensure a comfortable moving of the goals. The goal post complies with the latest FIH rules and regulations.

Order No. 90080

Field Hockey Goal Net

The net is made from high tenacity polypropylene (PP). The net measures a width of 3.66 m and a height of 1.80 m. The projection of the net is 0.90 m on top and 1.20 m on the bottom. The mesh width of the net is 45 mm. The net is available in 3 mm diameter. The net is green in colour.

'Flap Down Net System'

The 'flap down' net suspension system is a fully integrated and closed system. This means, all suspension parts are placed inside the goal post profile. The slot for the net suspension is covered to allow a smooth and safe appearance of the goal post.

Therefore, there are no sharp edges or corners at the goal post, which can cause harm to players. The suspension is realized by an aluminium profile, which holds the nets in place. The profile is designed to leave space for the net to be fixed perfectly. The whole system is covered with a flap. The flap is mounted, so it can open and close like a door. The flap can be locked to secure the net in the position. The design is registered of patent in Malaysia and Germany.

Order No. 90110
Upgrade to **FLAP DOWN NET HOOK** System for Goal Post competition.

Order No. 90111
Upgrade to **FLAP DOWN NET HOOK** System for Goal Post 3.00 x 2.00 m.

Interlock System

The INTERLOCK net hook system is a fully integrated system. This means all suspensions parts are placed inside the goal post profile. The hooks are placed in a specially designed slot in the goal post profile.

The hooks are placed approx. every 30 cm in the slot to keep the net in place and hang perfectly. The hook is shaped ergonomically and no adjustment has to be done to it. On the horizontal posts the hooks face the direction to lock the net due to gravity. On the vertical posts they are rotated against each other so they lock the movement of the net in both direction. With the INTERLOCK net hook system the of a goal post can be installed within minutes without any usage of tools.
