Wall Padding for Indoor (2 m)

The wall and column padding are made from a PE foam with a PVC canvas. Both materials used are fire retardant. The padding usually measures a height of 2.0 m. It is available in four and six cm thickness. The standard panel is 1.0 m wide. On demand, another dimension can be produced. The padding is equipped with fastening straps. They are placed at the top and bottom of the padding. The straps are fixed to the wall with aluminium flat bars. Additionally, the padding is held in position with Velcro, which is fixed on the back side of the padding. The padding is available in assorted colours. Special sizes and openings for corners and electrical or other outlets can be customized in accordance with the requirements of the jobsite.
