

AFNTM SPORTS NEWS

Powering the Youth Olympics

AFN proudly provided the equipment for the hockey tournament in 2018 Summer Youth Olympics in Buenos Aires, Argentina; which led to the historic win for both Malaysia and Argentina.

Making a Mark in the Asian Games

AFN contributed the range of equipment for track and field, hockey, football, rugby, beach volleyball, volleyball, basketball and SMG maintenance kit for the 18th Asian Games.

A WORD FROM OUR Chief Executive Officer

FOR THE LOVE OF THE GAMES

We are delighted to introduce you to our very first AFN NEWS publication produced internally right at the heart of AFN operations in Malaysia. We make every effort possible to engage with our clients as well as our business partners and this periodical is one of the many.

Let us start off by expressing our deepest gratitude on behalf of AFN to everyone who has been part of our journey so far, especially our clients. Since our humble beginnings in 2013, we've gone from strength to strength and this year we made our mark at the 18th Asian Games in Jakarta, Indonesia and The 2018 Summer Youth Olympics Games in Buenos Aires, Argentina. These achievements are a testament to not only our competences – but perhaps more importantly – your trust in our capabilities.

At AFN, we believe in quality and pursue perfection without compromise. We live and breathe these values from the moment we draw up orders to the last lick of paint on our products. We take painstaking measures to ensure only the finest leaves our gates so that you get to experience the best we have to offer, every step of the way.

Our best, too, goes beyond the nature of our business. On 12th of October, we embarked on a CSR project in collaboration with Magic Bus, an international NGO working towards a world in which children break out of the cycle of poverty. We engaged more than 1000 number of beneficiaries whom are children and gave them the opportunity to enjoy the possibility to do sports.

Needless to say, we are profoundly passionate about what we do because of its power to unite people regardless of creed, background or language. After toiling behind the scenes to equip the stage, we are proud to stand among the millions of supporters, applauding the glory of our sportsmen and sportswomen.

Thank you for believing in our dream too.

Magic Bus is an international NGO working towards a world in which children break out of the cycle of poverty, leading fulfilling lives and contributing positively to their communities.

By delivering programmes based on an activity-based curriculum, Magic Bus aims to ensure that children complete secondary education and are equipped with the life skills and knowledge they need to eventually transition to employment.

Magic Bus has been active in Myanmar since 2016 and has successfully expanded across Thanlyin and Hlaing Thar Yar townships in Yangon. Youth Mentors conduct 47 weekly sessions targeted at 11 to 14-year olds, providing a range of activities to develop children's communication, teamwork and problem-solving skills. AFN supports Magic Bus.

YOUTH OLYMPIC GAMES IN BUENOS AIRES

The Youth Olympic Games is an international multi-sport event organized by the International Olympic Committee or the IOC. The creation of the youth version of the Olympic games was approved in 2007 and the committee agreed that the games would be held every four years in staggered summer and winter events. The first summer version was held in Singapore in August 2010 while the first winter version was held in Austria in January 2012.

Among the many sports featured in the Youth Olympics, field hockey is one of the most closely followed rosters. Held from 7 to 14 October, the format for this event was Hockey 5s, which is a 5 a-side tournament played in a smaller field compared to a larger 10 a-side match of the same sports. The tournament took place at the Parque Polideportivo Roca in Buenos Aires, Argentina and was contested by 12 teams in both boys and girls category.

AFN played a pivotal role in setting the stage for the action-packed hockey tournament by supplying the International Hockey Federation or FIH standard goal posts. FIH is a 90-year old authority that aims to raise the global status and popularity of hockey. To achieve their objectives, FIH demands equipment of the highest quality and AFN is proud to be able to meet the supreme standards set by the federation.

Recommendation Letter From The Organiser

Buenos Aires, October 19th, 2018

Ref.: **Hockey 5's Sport Equipment – AFN Sports**

To whom it may concern,

The Hockey 5's competition in Buenos Aires 2018 Youth Olympic Games used equipment supplied by AFN Sports, as the awarded supplier in Buenos Aires City Government Hockey 5's equipment public tender.

This equipment was installed in the Hockey 5's training, warm-up and competition venue in the Youth Olympic Park.

We would like to acknowledge the professionalism and goodwill of all AFN Sports technicians who were very committed to provide the best training and competition conditions which resulted in a successful event.

The feedback we received from the delegations and FIH Technical Delegate was very positive.

I can recommend without hesitation AFN Sports Hockey 5's equipment and services.

Respectfully,

A handwritten signature in black ink, which appears to read "Cristobal Muñoz Farias". There are some orange and green ink marks around the signature.

Cristobal Muñoz Farias
Head of Sports
Buenos Aires 2018 Youth Olympic Games

In the recent years FIH (International Hockey Federation) has worked on a new type of hockey: the hockey 5s. This exciting new format is played with less players (5 per team) on a smaller field in three 15-minute periods. The smaller number of players makes it easier to find sufficient players for a game. The smaller field makes the game faster and creates more goal chances. The shorter periods allow not so fit players to enjoy the game as well and go all out. Additionally, there is no draws. If both teams scored evenly at the end of 3 periods, an overtime will be added to determine the winner. The playing field is surround by rebound boards, which keep the ball inside the playing field.

BRINGING THE BEST TO JAKARTA

The Asian Games, which is recognized by the International Olympic Committee or IOC as the second largest multi-sport event after the Olympic Games first began in 1951 in New Delhi, India. In August 2018, Indonesia took on the mantle to host the 18th installment of the prestigious games.

Powering the Asian Games was AFN, who is the official supplier of a range of equipment for track and field, hockey, football, volleyball, rugby, beach volleyball, basketball and SMG maintenance kit. AFN is honoured to supply quality equipment for a wide range of sports in one of the most historic installment of the series as Indonesia defied expectations to hold a smooth games.

PRODUCT DEVELOPMENT

Water Ditch Hurdle with Synthetic Crossbar

The water ditch hurdle is made from aluminium legs and a crossbar. The crossbar is made from synthetic material with an integrated aluminium core. The water ditch hurdle can be adjusted in height. The heights are 76.2 cm and 91.4 cm. The crossbar measures a total length of 3.66 m. The crossbar is square in shape and measures a width of 12.7 cm. The synthetic material is more durable to weather influences compared to common wooden crossbars.

Order No 10410/ SY Synthetic Crossbar

Take Off Board Competition Alu/Synthetic

The take-off board lockable and height adjustable is made from an aluminium core with a synthetic finishing. It is made from special aluminium profiles which support the training as well as the competition inserts. The dimension fits perfectly the installation trough and is equipped with stainless steel vertical adjustment bolts to level the take-off board, and with horizontal ones to secure it to the installation trough, preventing it from moving during use. The take-off area is a wear and tear part and can be replaced separately. Once the take-off board is in the right place it can be locked to maintain the required position.

Order No. 40155

Hockey 5s Rebound Board Mobile “COMPETITION”

The hockey 5s rebound board competition is made from special aluminium profiles. The boards are equipped with a special foam, which is surrounded by a PVC cover. The rebound boards can be locked with each other easily. They measure a height 25 cm. One set consists of corner pieces and straight pieces. One set is designed to cover a full pitch of 48 x 31.76 m. The front cover is designed in a way to give the required ball return. Therefore, a special foam was chosen to create the ball rebound to keep the game exciting. To enhance the lifetime of this product the foam is covered in weatherproof PVC. The item is designed for competitions of the highest FIH standards.

PlanoMatic

P703

Fully automatic paver for athletic tracks and multipurpose sports surfaces.

The PlanoMatic P703 is a new edition of the PlanoMatic series P700/P702. It is a fully automatic paver with a screed width of 2,800 mm enabling installation widths of maximum 2,700 mm.

The highest installation speed is 4.5 metres per minute, thus providing a theoretical performance of approx. 730 m²/h. P703 is designed specifically for the professional installation of athletic running tracks. With a weight of 850 kg and a narrow chain drive unit of 80 mm, the machine is easy to manoeuvre.

The installation widths can be selected individually; thicknesses are adjustable from 6 to 50 mm. An integrated automatic levelling device supports the even installation.

SportChamp

SC3D4HL

Multifunctional ride-on machine for the advanced maintenance of artificial turf.

The new SportChamp SC3D4HL offers a wide range of tasks for maintaining different synthetic sports surfaces in sports facilities. By the use of different attachments all synthetic sport surfaces can be cleaned and maintained according to the manufacturer's guidelines and beyond that for an efficient and economic upkeep of the surface.

The operating principle of the SportChamp SC3 has not changed:

In a single operation, SportChamp levels the infill material of filled surfaces with its steerable, low-wear brush and eliminates contamination at the same time. Thus the infill material will be loosened and the fibre will be put upright again. Impurities will be vacuumed into a large-volume filter box during the surface maintenance. The robust filter unit with high pulling power is controlled automatically and cleaned within minutes. Since the filter box opens for emptying automatically, you must no longer remove it for emptying.

With its effective working width of 1,100 mm, and the wide range of attachments, SC3D4HL will facilitate and accelerate all necessary care tasks.
