#### INFO

#### SECURING GOALS

Caution: danger of falling over! According to the regulations of local accident prevention federations and DIN/EN, movable goals must be secured against falling over. For example, with a junior goal with a 1.5 m base depth, a 125 kg counterweight is necessary to ensure a stability of 1100 N in accordance with DIN/EN.

For junior goals with ground frames of rectangular profiles

100 kg – for a depth of 2 m:

125 kg – for a depth of 1.5 m
